Folic Acid, Birth Defects and Food Fortification: What's the Problem?

James L. Mills, M.D., M.S.
Senior Biomedical Research Scientist and Senior Investigator, Epidemiology Branch
Eunice Kennedy Shriver National Institute of Child Health and Human Development
National Institutes of Health

Wednesday, January 16, 2019 • 11:00 a.m. – 12:00 noon
ODS 1st Floor Conference Room
6100 Executive Boulevard • Rockville, MD 20852

Dr. Mills is a Senior Biomedical Research Scientist and Senior Investigator in the Epidemiology Branch at the Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health. He has a secondary appointment in the Section on Genetics and Endocrinology. He received his training at the University of Pennsylvania (B.A., M.S. in Epidemiology, Pediatric Residency and Pediatric Endocrinology Fellowship), New York Medical College (M.D.) and Cornell University (Pediatric Residency). He was a Robert Wood Johnson Clinical Scholar at the University of Pennsylvania.

He is a member of the Society for Pediatric Research, American Pediatric Society, American Epidemiological Society and Teratology Society and is a Fellow of the American College of Epidemiology. His primary research interests are birth defects and other pregnancy problems. His interest in neural tube defects has led him into studies of folate where he has worked in biochemistry, genetics, epidemiology and public health policy. He has conducted numerous studies on genetic risk factors for birth defects. Recently, he has combined his interests in pediatric endocrinology and genomics to investigate genetic factors in pediatric adrenal diseases.
